PROJECTS

House Search, [Github](#) — React

Overview

Find and list houses for sale or for rent. This is a React / Firebase project. It is what I made to get used to the basics of React. It allows users to add, update and delete properties they are selling or renting. It uses REACT with Firebase.

Tech Support Desk App, [Github](#) — React

Overview

Tech Support ticket application built with the MERN stack. I made this to get more practice with React and Redux and using MongoDB as the database

EDUCATION

THINKFUL Bootcamp — Full-Stack Nights and Weekends

March 2020 - December 2020

Learned industry best practices and practical software development standards in JS, React, and Node.

Studied important computer science topics such as algorithms & data structures.

Created and deployed mobile-first applications while collaborating remotely with experienced web developers.

EXPERIENCE

Phillips and Temro, Eden Prairie, MN — Material Handler

September 2018 - March 2020

Managed inventory to supply project lines with parts needed for the continued production of over 1000 products.

Communicated with product lines and management to predict shortcomings and enhance production times.
